The Tin

Music and Arts

The Tin Music and Arts is a charitable organisations that runs events at its own venue, The Coal Vaults based in Coventry's Canal Basin, as well as other venues in the city.

The Tin's own venue is made up of 2 converted coal vaults which were built in the 18th century. The Tin at the Coal Vaults is made of up of 2 main spaces, one of which contains a stage and performance area, the other has a bar and seating area. Within the performance area we have an excellent newly installed FOH PA and monitoring systems.

We have been running music and cultural events in Coventry since 2001 (previously as The Tin Angel and Taylor John's) and have won

two regional awards for 'Best Venue' in consecutive years. As well as venue staff, we also have an inhouse marketing and design team who are dedicated to working on all shows that we are involved in.

Our events programme is innovative, diverse and challenging. We have a reputation for supporting high quality and innovative arts and artists from Coventry, the UK and all over the world.

As well as programming events in our own venue, we also put on shows elsewhere in the city. We've programmed and delivered live music events which have taken place in loventions ranging from shop fronts, warehouses and churches to venues with capacities ranging from 50 - 500 plus.
